Subject: "TESTIMONY" SB123

To the Judiciary Committee:

The original bill, in my view, was created and made retroactive as a method to reduce state budget costs and reduce the prison population numbers so it appeared there were less in these institutions.

Look at the number of rearrests being reported of those released under that program, including committing murder, and it will indicate the program may have saved the state money but has not been successful in reducing crime and becomes a real public safety issue.

I am in favor of SB123: AN ACT REPEALING
THE RISK REDUCTION CREDIT PROGRAM
